Total					\$2,000	

Detailed Project Description and Justification:

The Village Council will purchase new septic pumping equipment to replace a worn down, old pumper that is in poor condition. Pumping in 2007 was delayed due to this faulty equipment and homes are still waiting to be pumped because parts have not arrived to repair the old pumper. The current pumper is over 20 year old and needs to be replaced to provide service to all homes which have individual septic tanks and must be pumped annually.

Project Timeline:

Purchase and shipment would be expected in June 2008

Entity Responsible for the Ongoing Operation and Maintenance of this Project:
